

29 September 2025

Request

I would actually like to receive information on how many spaces are reserved for RPZ Residents in the Zones, and the actual amount of Permits that have been issued against the actual spaces.

There are the 4 Zones:-

St Thomas

St Mark's

Cheapside

Richmond Road

The applicant has requested the information for the year 2024.

Response

The number of car spaces reserved for RPZ residents per zone:

St Marks Residents Parking Zone: 112 spaces

Richmond Road Residents Parking Zone: 19 spaces

St Thomas Residents Parking Zone: 213 spaces

Cheapside Residents Parking Zone: 88 spaces

Total number spaces in Residents Parking Zones: 432

The number of car spaces reserved for RPZ residents per zone is available online via the mapping system:

[Residents Parking Zones](#).

The number of permits issued is as follows:

St Marks Residents Parking Zone: 147 residents and 8 businesses

Richmond Road Residents Parking Zone: 18 residents

St Thomas Residents Parking Zone: 243 residents and 16 businesses

Cheapside Residents Parking Zone: 111 residents and 15 businesses

There are more permits issued than spaces available.

The number of additional permits is based on several factors, including, that business permits have specified hours, not every permit holder is looking to park at the same time, e.g. shift workers, those away from the island and vehicles requiring maintenance etc. A factor also considered when providing permits is to allow for residents being able to park between 5pm and 9am in paycard areas.

A permit does not provide exclusive use to parking in a certain road, but rather within a specified zone.
